25X1

1. The Institute of Haematology and Blood Supply (Instytut Hematologii i Krwiodawstwa) in Warsaw is to start production of dry human plasma from blood supplied to the institute by blood donor stations.
2. The plasma is to be preserved by "freeze drying" (lyophilization). The moisture content of the dried plasma amounts to one per cent water. The bottles used for the preservation have an opening of 40 mm. in diameter, closed by a cork covered by a metal screw cap.
